## DETAILED ACTION

### *Election/Restrictions*

1. Restriction to one of the following inventions is required under 35 U.S. C. 121:

- I. Claims 1-6, and 8-31 are directed to a method of introducing a compound into a cell that expresses costimulatory molecules *in vitro* and *in vivo*, wherein the compound is a nucleic acid. Classified in Class 514, subclass 44, and class 435, subclass 325.
- II. Claims 1, 2, 7, 11-16, 18-24 are directed to a method of introducing a compound into a cell that expresses costimulatory molecules *in vitro* and *in vivo*, wherein the compound is a protein. Classified in Class 514, subclass 2.

2. The inventions are distinct, each from the other because of the following reasons.

Inventions II and I are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case, the different methods use different starting materials, namely nucleic acid and protein, each belongs to a distinct chemical entity and acquires a separate status in the art, and thus the different method of using such would have different method steps, different modes of operation, and have distinct technical considerations.

The differences of the Inventions I and II are further underscored by their divergent classification and independent search criteria.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter and different search criteria, it would impose an undue burden to the Office if examined together, thus, restriction for examination purposes as indicated is proper.

3. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is advised that where a single claim encompasses more than one invention as defined above, upon election of an invention for examination, said claim will only be examined to the extent that it reads upon the elected invention.

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Q. Janice Li whose telephone number is 703-308-7942. The examiner can normally be reached on 8:30 am - 5 p.m., Monday through Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Karen M Hauda can be reached on 703-305-6608. The fax numbers for the
